(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The structure is located in Huntington Park, adjacent to the city of Vernon, the first "exclusively industrial" city in America. The structure is a very basic industrial/commercial building and is non-distinct architecturally. The building is in keeping with the industrial/residential setting it is in. Research of available Sanborn Fire Insurance Maps indicates that this structure was originally constructed to be used by a wood, metal, and pattern manufacturing company.

The integrity of this property is low due to updating of the structures in its immediate vicinity. Additionally, it is not a particularly good example of the architectural style or of a method of construction. Research of available historical records has not uncovered any significant associations of the occupants.
